licenseheadertool Documentation
Release 0.0.1

Paul Brian

March 18, 2013

CONTENTS

One is supposed to put a header at the top of every OSS file similar to below

```
#!/usr/bin/env python
#! -*- coding: utf-8 -*-

###
# Copyright (c) Rice University 2012
# This software is subject to
# the provisions of the GNU Lesser General
# Public License Version 2.1 (LGPL).
# See LICENCE.txt for details.
###
```

But you have shell, python, javsscript, php and java files in your repo, and maybe dozens of them. Fixing them all up is a pain. This is trying to releave the pain.

No its not clever, and it could break, but its a loit faster than writing it yourself.

I also intend to devlop it as a plugin for flake8
